Liquidyne Process Technologies has a limited supply of Minncare® Cold Sterilant for immediate use.

Minncare® Cold Sterilant:

- Does not produce toxic aldehyde vapors
- Compatible with thin film composite membranes
- Superior biocidal activity
- Easily disposable
- Biodegradable

Minncare Cold Sterilant cleans and protects distribution systems against short and long term bacterial problems. Minncare Cold Sterilant is a powerful oxidant that stops organism growth by oxidizing microbial cell proteins and enzyme systems and effectively removes biofilms. Elimination of bacterial contamination will help improve product quality and contribute to system life and if used increased RO membrane sustainability. View detailed information at [Minncare® Cold Sterilant offered by Liquidyne.](#)
